

Valedictory note from ICCAR 2018 and SAR

- To build a network involving those working on various aspects of AMR across the country and neighbouring places.
- To launch massive awareness programmes on the use and misuse of antibiotics through various seminars, symposia, conferences under the umbrella of SAR.
- To initiate crowd funding strategies (fund raising) to fund AMR research.
- To emphasize issues relating to effective antibiotic effluent treatment, incentive for appropriate marketing of pharmaceuticals, use of growth promoters in veterinary science and one-health approach.
- To target and modulate host factors that are critically required for survival and spread of drug resistant pathogens.
- To involve more clinicians in this network of research.
